Disclaimer: The views, opinions, and comments expressed are solely my own and do not represent the official position, policies, or views of my current employer.

Use AI to prepare for your job search and show employers what you can contribute.

By the end of this session, you should be able to:

Understand the employer's needs – Identify the problems they need help solving.

Show evidence of your strengths – Connect your skills and experience to those needs.

Prepare with AI – Improve your application and practise interview answers that reflect your real abilities.

“Give employers a clear reason to choose you.”

The Workplace Is Changing. Are You Ready?

Knowing how to use AI is becoming part of being job-ready, much like Microsoft Office.

Interview invitation probability for candidates with AI skills in a 2026 experiment with 1,700 recruiters.
arxiv.org

8–15% higher

Source: Stephany et al. (2026), research preprint. Hypothetical CV experiment with UK and US recruiters; not Brunei-specific.

For jobseekers, this means:

- Build practical AI skills relevant to the work you want.
- Apply your own judgment to check and improve its output.
- Show employers the difference you can make.

“Today is about using AI to become a stronger candidate and a more capable employee.

Prompting for Employability

Understand a vacancy

Compare this vacancy with my actual experience. List the essential and preferred requirements, my genuine strengths, missing qualifications, and questions to ask the employer. Suggest honest ways to improve my application. Do not invent achievements or assume I meet a requirement. Vacancy: [paste advert]. My experience: [paste anonymised summary].

1

Improve your CV

Tailor my CV for this vacancy using only the facts I provide. Rewrite my profile and up to four experience bullets in clear English. Highlight relevant skills. Ask me for missing evidence. Do not add qualifications, duties or numbers. Vacancy: [paste]. Anonymised CV: [paste].

2

4

Practise an interview

Act as an interviewer for [role] at a [type of organisation] in Brunei. Ask one question at a time and wait for my answer. Then give brief feedback on relevance, clarity and evidence. Help me structure real examples using Situation, Task, Action, Result. Practise in [English or Bahasa Melayu].

3

Find and close skills gaps

Compare my skills with this vacancy. Separate mandatory qualifications from skills I can practise. Prioritise three gaps and create a two-week plan using free or low-cost learning and small practical tasks. Suggest evidence I can show an employer. Do not claim practice replaces a required certificate. Vacancy: [paste]. My skills: [list].

Showing your value at interview

1 Understand the employer

What problem needs solving? What does success look like? Think fewer errors, faster service or happier customers.

2 Show real evidence

What have you actually done? Use school, volunteering or family business examples. Explain your action and result.

3 Connect your contribution

How could you help in this role? Offer a realistic contribution. Ask how the employer would measure success.

“Why would hiring you help us?”

~~“I am hardworking, a fast learner and good at communication.”~~

“From the vacancy, I understand this role involves handling customer enquiries accurately. When helping at my family’s shop, I dealt with questions and checked information before answering. I would bring that same care here. I’d also want to learn how your team measures good customer service.”
